Microsoft .NET Framework 4.0
PROFORMANCE Product Registration Code

Server PreReqs:

OnBase version 10.0 or higher
SQL 2008 R2 or higher Has not been tested on SQL 2005

Features and Limitations

- The purchase of this product is for bank-wide use. You may install and run it on as many workstations as needed.
- This upgrade supports the ability for multiple people to run the application at the same time.
- This product is now registered based on the domain name of the company not the machine name of the workstation.
